

Section

Plan

The single sawn bluestone channel is the typical and preferred detail in Central City Laneways that are not covered by Heritage Overlays in the Planning Scheme.

Channel stones are the standard 250 x 100mm thick sawn bluestone channel sections and cut in 900mm lengths.

For typical construction details, refer to City of Melbourne, Engineering Standard Drawing:
Bluestone Kerb and Channel Setting Details Dwg No. 1P 50406.
