

Isometric view

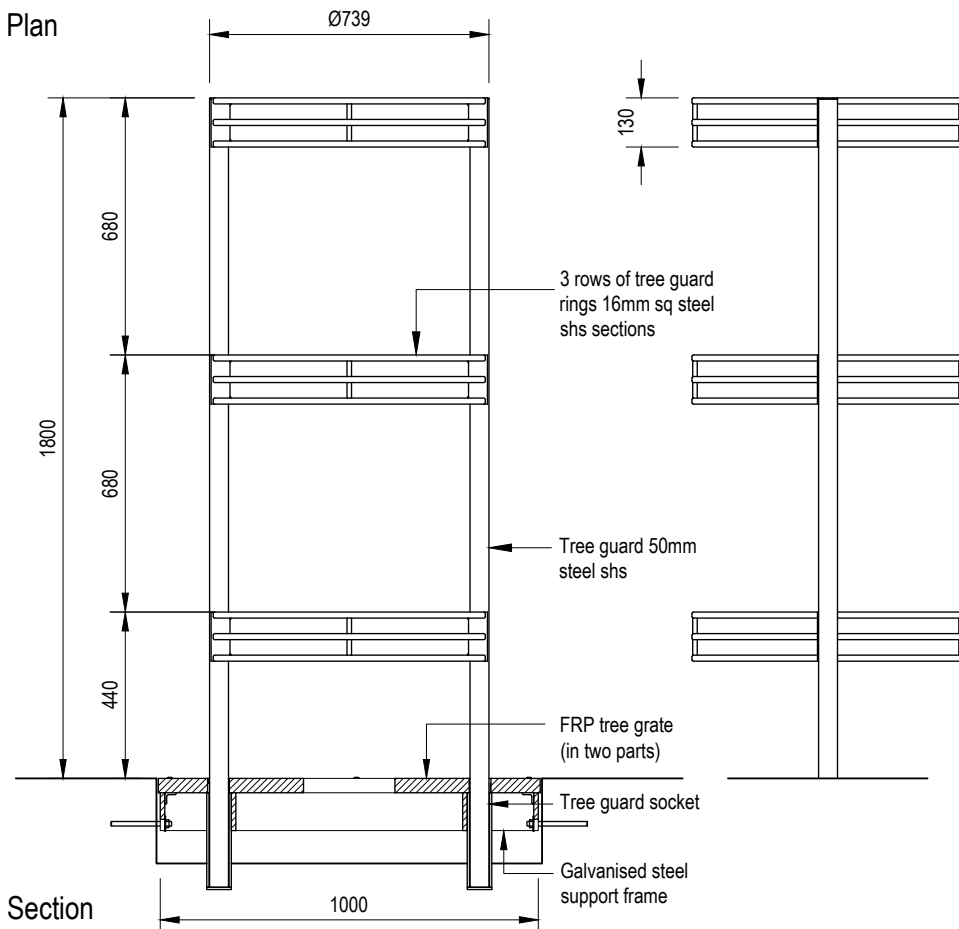

The Bio-retention Tree Guard and Grate is designed to protect trees as part of the Water Sensitive Urban Design (WSUD) tree pit used with selected streets and laneways of the Central City and Docklands.

The FRP tree grate is supported by a galvanised steel frame. The tree guard is fabricated from mild steel and powder coated Dulux 'Silver Glow Pearl' 84623. For fabrication & installation drawings, refer to City of Melbourne, City Design drawings; Project No: 902431
